HOW IT WORKS

& WHY THIS PLAN IS RIGHT FOR YOU

OVERVIEW

Since 1944 Medidenta.com has focused its business operations on making dentistry innovative, efficient and cost effective. This philosophy is at the heart of our amalgam separator program. With our program your office will be EPA compliant with our Mars Liberty Boss Amalgam Separator, which is maintenance free for up to 3-years. That means, hassle free compliance, at an industry low entry price and low annual service plans.

WHY ACT NOW?

The EPA will soon require all dental offices to be equipped with amalgam separators. Currently multiple states or counties already require one because of high mercury readings in the water in their areas. Even if your county or state does not yet require an amalgam separator, it doesn't mean that harmful mercury emissions aren't getting into your local waterways. An amalgam separator curbs this toxic waste.

WHAT SEPARATES OUR AMALGAM SEPARATOR FROM THE REST?

- 1- Features highest ISO 11143 mercury recovery of 99%.
- 2- Requires NO filter changes. This means no exposure to toxic mercury or bio-hazardous waste for you and your staff.
- 3- Maintenance free for up to 3 years... which means install it and forget about it.

	Initial Price	Annual Fee	Maintenance Free
medidenta.com	\$599	\$349	YES
Solmetex Hg5	\$785	\$300-600*	NO
DRNA BU10	\$750	\$500	NO

*avg filter change cost \$300

This program is the most cost effective solution to amalgam waste in your office.

SEPARATOR LIFE-CYCLE EXPIRATION

We will send you a new M.A.R.S amalgam separator **AT NO ADDITIONAL CHARGE**, simply continue paying your annual program fee. Included in the price is shipping to the disposal facility and shipping the new unit to you. **YES, we make it that simple!**

TO GET STARTED

To get started with our program you pay a ONE-TIME fee of \$599 and then as little as \$349 annually*

WHAT ABOUT THE REST OF MY AMALGAM WASTE?

Our AmalGon waste disposal kit allows you to properly dispose of all other types of amalgam waste like chair side traps, teeth with amalgam fillings and any excess amalgam.
